

## Carl Brunsting

March 26, 2026

Carl Henry Brunsting departed this world peacefully on March 26, 2026. He was 68. Carl was born in 1957 in Pryor, Oklahoma to Nelva and Elmer Brunsting. After earning a Bachelor of Environmental Design from Texas A&M in 1979, he went on to earn a Master of Architecture from Rice University in 1981. Carl worked for many years with his great friend and mentor Charles Tapley, and later opened his own design studio in Houston where he enjoyed working on various design projects for his clients. Carl was an extraordinary visionary who loved architecture and had a profound respect for preservation of the environment and the natural world. Besides possessing a stunningly brilliant and creative mind, he was also one of the kindest, calmest, and compassionate person who loved his family beyond measure.

Carl is survived by his wife, Drina, of 44 years, their daughter Marta Huntsman and her husband, Ryan, granddaughter Haley, and beloved dogs Desi, Shash, and Joni. The family would like to express their appreciation to the nurses of Allegiance Hospice; most especially Lisbet, Elaine, and Susan for their extraordinary care and compassion. Also sincere gratitude for Crystal Perez and her remarkable staff at Village Green Memory Care in Tomball; every one an angel.

In accordance to his wishes, no services are planned. He instead desired that you spend time walking in nature, "afoot and lighthearted", with someone special in his memory.

The Addison family and staff of Magnolia Funeral Home extend condolences

to Carl's family and friends during this difficult time.

No services are scheduled through the funeral home.
